UNUSUAL

PLANTS

NEW INTRODUCTIONS
FROM ALL PARTS OF
THE WORLD

501 Twenty-Fourth
Street, Santa Monica
California

The plants offered for sale in this catalogue are with few exceptions, either very rare or entirely new introductions to California.

We have in addition quite a number of new plants which we have not listed for the reason that our stock at present is quite limited. Some of these we can furnish upon application and shall be glad to answer any inquiries on the subject.

In filling orders we make a practice of sending cultural directions in the case of plants needing some special treatment.

The plants marked with an asterisk (*) we have at present either in very limited quantities or in course of propagation and available at a later date.

LARGE SPECIMENS OF MOST OF THE PLANTS LISTED HERE CAN BE SEEN IN OUR GARDENS.

FLOWERING TREES AND SHRUBS

1. **Abelia schumannii**
China. Somewhat similar to the common *Abelia grandiflora*, does not make quite so large a bush, the flowers instead of being white are a beautiful rosy pink, very beautifully shaded and marked. A very choice and rare shrub. Strong plants.....\$.50 and \$1.00
2. **Abelia triflora**
China. Tall, strong growing, slender shrub with arching branches, white flowers in clusters at the end of the new growth, resembling somewhat the *Bouvardia* flower. Very fragrant. Strong plants\$.50
3. ***Abutilon speciosum**
A rare dwarf and compact *Abutilon*, very floriferous and showy, unusually large, bright orange flowers. Attracts attention anywhere. Strong plants\$.75
4. ***Abutilon variety**
Larger growing than the preceding, but of a compact habit, large, dark red flower. Handsome free flowering shrub. Strong plants\$.50
5. ***Allamanda nerifolia**
South America. Tubular dark yellow flowers on the young growth, evergreen shrub about eight feet high, will stand well outside in areas which are protected from hard frosts. Beautiful and rare. 4 inch pots\$1.00
6. ***Alstonia scholaris**
India. Evergreen shrub, bright green foliage, white tubular shaped flowers with twisted petals on the young growth, likes plenty of water. Very rare and beautiful. 4 inch pots \$1.00
7. **Aster fruticosus**
South Africa. Evergreen shrub, masses of rosy mauve flowers all along the stems, very free blooming and beautiful. Does particularly well in California. Is quite new, no introduction in recent years has more merit than this shrub.\$.75 to \$2.00
8. **Baeckia virgata**
Australia. A medium sized evergreen shrub, graceful, pendulous habit, small dark green foliage, mass of fragrant white flowers in summer, somewhat resembling *Leptospermum*. New introduction. Strong plants\$.75
9. **Barleria coerulea**
South Africa. Evergreen shrub, can be grown either as a shrub or a climber, covered in summer with light blue tubular shaped flowers. A new introduction and very pretty. 1 gallon cans\$.75
10. **Barosma pulchella (Buchu plant)**
South Africa. Heath-like evergreen shrub, masses of small white or mauve flowers, foliage and flowers very aromatic. Good shrub, new introduction. 1 gallon cans.....\$.75
11. ***Bauhinia candicans**
South America. Large shrub or small tree, large, pure white flowers in summer, shaped like a butterfly. Extremely beautiful and scarce. 1 gallon cans.....\$.75
12. **Bauhinia tomentosa**
India. Medium sized shrub, drooping yellow bell shaped flowers with a dark blotch on the upper petal, very prolific summer bloomer. A first class garden shrub. 1 gallon cans\$.50
13. ***Beaufortia decussata**
Australia. Dwarf shrub, bright red flowers shaped like a Bottle Brush. Very pretty and rare.....\$1.25

- 14.***Beaufortia squarrosa**
Australia. Dwarf shrub, lilac colored flowers. Very pretty and rare\$1.25
- 15.***Boronia elatior**
Western Australia. Dwarf shrub, bright green heath like foliage smelling like Rue. Very slender twiggy branches covered in spring and early summer all along the new growth with masses of deep rose or bright carmine bell-shaped flowers. Very choice and beautiful small shrub. Does equally well in sun or half shade, likes plenty of water. 1 gallon cans.....\$.75
- 16.***Bouvardia triphylla**
Mexico. Dwarf slender shrub, twiggy branches. Masses of bright scarlet tubular shaped flowers nearly all summer. Either sun or half shade. A very showy and beautiful thing. 1 gallon cans.....\$.75

Bouvardia hybrids varieties in different colors.
- 17.***Bowkeria gerardiana**
South Africa. Tall strong growing evergreen shrub, handsome dark green tomentose foliage, clusters of satiny white calceolaria shaped flowers which are very waxy and viscid. New introduction. 1 gallon cans.....\$1.50
18. **Brunfelsia floribunda**
South America. Medium sized compact growing shrub. Very rich dark green foliage, deep violet colored flowers with white eye on the young growth in spring. The flowers turn to white with age and are very fragrant. Beautiful and aristocratic shrub, should be in every garden. 1 gallon cans\$1.50
- 19.***Brunfelsia lindeniana**
South America. Somewhat similar to the preceding, larger leaves sometimes attaining a considerable size, somewhat tomentose, flowers of beautiful purple color with white eye, fragrant. Rare and aristocratic. 6 inch pots.....\$10.00
20. **Buddleia salvifolia**
South Africa. Very strong growing shrub covering a large space, handsome pubescent foliage, large trusses of very fragrant lavender flowers. One of the best of all the Buddleias. Very easy to grow.....\$.50
- 21.***Calliandra eriophylla**
Arizona and Mexico. Dwarf shrub with very neat habit, pink flowers shaped like a pom-pom. Likes full sun and will stand a great deal of drought. Fine for a sunny slope or desert garden.....\$.75
- 22.***Callistemon brachyandrus**
Australia. Young foliage pubescent, flower spikes two to three inches long, filaments dark red with golden yellow anthers. Very pretty. 1 gallon cans.....\$1.00
- 23.***Callistemon lateritia**
Australia. Strong growing evergreen bush of pendulous habit, a distinct improvement on the type, very large Bottle Brush flowers of vivid growing scarlet.....\$.75

Callistemon hybrids in unusually fine varieties, colors from rosy pink to purple.
24. **Calodendron capensis**
Cape of Good Hope. Makes eventually a large tree. Evergreen for ten months of the year. In fact, does not always lose its leaves entirely. Large panicles of lilac colored flowers. Fine for either gardens or street planting. No more beautiful tree grown in California. 5 gallon cans.....\$3.50

25. **Calothamnus aspera**
Australia. Medium sized shrub, handsome gray needle like foliage, crimson flowers. Fine shrub. 1 gallon cans....\$1.00
26. **Candollea cuneiformis**
Australia. Small shrub, single sulphur yellow colored flowers somewhat like a wild rose. Very pretty shrub and rare. 1 gallon cans\$1.50
- 27.***Cantua bicolor (Sacred Flower of Peru)**
Similar to Cantua buxifolia with the exception that the flowers are yellow and cream color, beautifully marked inside, blooms in drooping corymbs. Very rare. 1 gallon cans\$3.00
28. **Capparis spinosa (Caper plant)**
Southern Europe. Trailing shrub, very beautiful flowers, white with mauve stamens. Fine thing for rockeries, walls or banks. Quite uncommon. 4 inch pots.....\$1.50
29. **Carpenteria californica**
An unusually beautiful native shrub, large trusses of very fragrant large white flowers with yellow anthers on long stalks. Very superior to the plants we grow in our gardens known as Syringas. 1 gallon cans.....\$1.00
30. **Cassia splendida**
South America. Good sized much branched shrub, six to ten feet. Panicles of large bright yellow flowers, much the handsomest of all the Cassias which can be grown in California and very seldom seen. A splendid thing and very rare. 1 gallon cans.....\$2.50
31. **Ceratostigma Wilmottiana**
China. Dwarf shrub, masses of deep blue flowers in umbels most of the year. Will grow anywhere and does equally well in sun or shade and is gay and happy in any situation. Fine for naturalizing, will resist drought. 1 gallon cans\$.50
32. **Cestrum fasciculatum**
Mexico and Central America. Medium sized shrub, handsome tomentose foliage, bright scarlet flowers in large drooping globular clusters, very free blooming and handsome shrub, flowers in winter and early spring. Attracts attention anywhere. 1 gallon cans.....\$.75
- 33.***Chamaelaucium ciliatum (Geraldton Wax Flower)**
Australia. One of our new introductions and one of the best things brought in recently. Blooms over a very long period, particularly in the winter time. Graceful sprays of waxy white flowers changing off to pink. Very beautiful as a cut flower, lasts a week or ten days in water. Rare and aristocratic shrub.....\$2.50 up
- 34.***Chamaelaucium ciliatum—red**
Same as preceding, with red flowers. Very rare. 2 inch pots\$3.00
35. **Chironia ixifera**
South Africa. One of our introductions. Dwarf compact sub-shrub, silvery blue foliage, masses of small single pink flowers like a Gentian. Good for rockery. 1 gallon cans\$.75
36. **Chorizema grandiflora**
Australia. Low growing shrub, spreading over the ground, considerably darker bloom than the other Chorizemas, tomentose foliage. Very beautiful. 4 inch pots.....\$.75
37. **Cistus purpureus**
Hybrid. Lilac purple colored flowers three inches across, petals yellow at the base with maroon blotch. The show-

- iest and best of all the Cistus family, strong growing with healthy foliage, likes full sun. 1 gallon cans.....\$1.00
38. **Clerodendron fallax**
Java. Shrub to about five feet, very large glossy tomentose leaves, sometimes attaining a considerable size, large erect panicles with many flowers, vivid scarlet color. Likes a partially shady situation, is susceptible to heavy frost. There is no more beautiful shrub where it is well grown. 6 inch pots\$1.50
39. **Coleonema pulchra**
South Africa. One of our introductions, resembles the well known Diosma or Breath of Heaven in every particular, including fragrance, with the exception that the flowers, instead of being white, are bright rosy pink. Very hardy and healthy shrub in this climate, stands a considerable amount of cold. Would be a fine thing to naturalize on banks and hillsides. 1 gallon cans.....\$.75
40. **Convolvulus cneorum**
South Europe. Beautiful small silvery foliage, single pure white satiny flowers, shrub about two feet high, spreading habit. A beautiful shrub for a bright, sunny situation. New introduction. 4 inch pots.....\$1.00
- 41.***Correa bicolor (Australian Fuchsia)**
Australia. Compact shrub growing eventually to about five feet in height, tubular drooping flowers red and green. A very unusual and attractive shrub. 4 inch pots.....\$2.00
- 42.***Correa pulchella (Australian Fuchsia)**
Australia. Bell shaped flowers of a delicate pink color. Very choice and pretty shrub. New introduction. 4 inch pots\$1.75
43. **Coulteria tinctoria**
China. Small evergreen tree, handsome dark green pinnate foliage, yellow flowers in good sized racemes, the seed pods following turn a reddish color and are quite handsome. 1 gallon cans\$.50
- 44.***Cowania Stansburyana**
Arizona and Mexico. New introduction belongs to the Rose family. Medium sized evergreen shrub, neat, attractive foliage, in bloom is covered with masses of creamy yellow single flowers. A very choice and beautiful shrub. 1 gallon cans\$1.50
45. **Crotalaria agatiflora (Canary Bird flower)**
East Africa. Evergreen shrub with striking sage colored pinnate foliage, racemes sometimes two feet long, of large yellow pea shaped flowers giving the effect to the plant of a number of canary birds clinging to a bough. This shrub is a strong grower and in a sunny situation is one of the most spectacular things imaginable. Does better for being cut back hard after it is through blooming. 1 gallon cans\$1.50
46. **Crotalaria capensis**
South Africa. Medium sized evergreen shrub somewhat resembling a Genista or Broom, yellow flowers in drooping racemes, pea shaped. Very free blooming and attractive. Unusually good shrub.....\$.75
- 47.***Cytisus praecox (Moonlight Broom)**
Dwarf growing, masses of cream colored flowers in winter and early spring. Very seldom seen.....\$.50
- 48.***Cytisus spinosus**
Very thorny and strong growing Broom, deep yellow, fragrant flowers in masses. One of the best of the family.\$.50

- 49.***Daubentonia puniceus (Syn. Sesbania)**
 South America. Deciduous leguminous shrub, drooping racemes of scarlet flowers in summer, showy and attractive. Does better in a hot situation where it is a very handsome thing\$.50
- 50.***Daviesia latifolia**
 Australia. Medium sized evergreen, twiggy shrub growing to about seven feet tall, literally covered with small orange yellow flowers resembling the Chorizema. Beautiful and rare. New introduction.....\$1.50
- 51.***Delastoma rosea**
 South America. Belongs to the Bignonia family. Strong growing, evergreen shrub, large, handsome leaves, clusters of trumpet shaped, pink flowers on the young growth. A rare and beautiful plant. New introduction. 4 inch pots\$1.50
- 52.***Dendromecon rigidum**
 California. Evergreen shrub belonging to the Poppy family, light green foliage, masses of deep yellow Poppy shaped flowers varying from one to two inches across. A very good garden shrub, a good bloomer and when covered with flowers is a beautiful sight. Should be more planted than it is. Strong plants\$.75
- 53.***Dombeya acutangula**
 Mauritius. Large, strong growing, evergreen shrub, very handsome foliage, big clusters of rose pink flowers. Beautiful flowering shrub.....\$.50
- 54.***Dombeya natalensis**
 South Africa. Strong growing evergreen shrub, bunches of pure white flowers covering the entire bush in winter and early spring. Very pretty.....\$.50
- 55.***Dombeya wallichii**
 Madagascar. Strong growing evergreen shrub or small tree, large handsome foliage, drooping umbels of rose pink flowers. Makes a fine specimen. 1 gallon cans.....\$.75
- 56.***Drimys winteri**
 Chile. Belonging to the Magnolia family. Large evergreen shrub with handsome shining dark green foliage with red branches, large drooping racemes of pure white flowers. Very rare and unusual. New introduction. 1 gallon cans\$3.00
- 57.***Dryandra formosa**
 Australia. Belongs to the Protea family. Evergreen shrub, finely cut foliage, large bronze colored cone shaped flowers in winter and spring. Striking and beautiful thing, rare and very scarce. New introduction.....\$2.00
58. **Entelea arborescens**
 New Zealand. Evergreen tree, large handsome foliage, white flowers on good sized terminal heads, makes a dense top. An excellent shade tree.....\$.50
- 59.***Eranthemum pulchellum**
 (Syn. **Dedalacanthus nervosus**)
 Tropical America. Low growing shrub, handsome foliage, deep blue flowers on the ends of the branches. Very pretty. 1 gallon cans.....\$.50
- 60.***Erica cerinthoides**
 South Africa. Beautiful Heather, terminal heads of very large deep carmine tubular flowers, one of the most beautiful of all the Heathers. Will do well in a rather dry location\$.50

- 61.**Erica verticillata*
South Africa. Medium sized Heather to about three feet, vivid scarlet tubular shaped flowers on the young growth. These two *Ericas* are in our opinion among the showiest of the whole genus.....\$.50
- 62.**Eriostemon myoporoides*
Australia. Small compact evergreen shrub covered in the spring and early summer with fragrant white flowers with a blush tinge. Very rare and beautiful. New introduction.\$1.50
63. *Erythrina caffra* (Coral Tree)
South Africa. Makes eventually a large tree. In spring and early summer the whole tree is literally a sheet of scarlet bloom, one of the showiest trees in existence. 1 gallon cans\$1.50
64. *Erythrina coralladendron* (Coral Tree)
South Africa and the Tropics in general. Not as tall growing as the preceding. Long massive spikes of scarlet flowers. 1 gallon cans.....\$2.50
- 65.**Erythrina indica* (Coral Tree)
India. Good sized tree, dark green foliage, spikes of vivid wine colored flowers in early spring. One of the handsomest of all the Coral trees and scarce. 1 gallon cans \$2.50
66. *Erythrina poeppigiana*
American Tropics. A good sized tree, handsome foliage covered most of the summer with erect spikes of scarlet flowers like candelabra. A very beautiful tree for the garden. 1 gallon cans.....\$2.00
- 67.**Erythrina speciosa*
South Africa. The dwarfest of the shrubby species, makes only a short trunk. The flowers which are in very long showy spikes are crimson instead of scarlet and it is an unusually beautiful and aristocratic plant when in full bloom. A large shrub of this in our garden has attracted as much attention as anything in the place. Very scarce and rarely seen. 1 gallon cans\$3.50
68. *Escallonia organensis*
South America. A somewhat dwarf growing evergreen shrub, handsome dark green foliage, the young shoots being a reddish color. Masses of deep rose pink flowers. One of the most beautiful of all the *Escallonias* and rare. 1 gallon cans\$1.50
69. *Eucalyptus caesia*
Western Australia. Slender weeping tree to about twenty feet, dark brown trunk, white branches and silvery gray foliage. The tree when in full bloom is a mass of rose pink flowers with golden antlers in long drooping racemes. A very beautiful and aristocratic tree. New introduction. 1 gallon cans.....\$1.25
70. *Eucalyptus constricta*
Western Australia. Dwarf tree, new species. Pretty small red flowers beautifully arranged and effective. New introduction, rare. 1 gallon cans\$1.25
71. *Eucalyptus eremophila*
Western Australia. Small tree, lovely golden yellow flowers. New. Strong plants\$1.50
72. *Eucalyptus erythrocorys*
Western Australia. Tree to about twenty feet, white trunk, vivid scarlet colored caps, large heads of golden yellow flowers. Very beautiful and distinctive. New introduction and rare. Strong plants.....\$1.25

- 73.***Eucalyptus erythronema**
Western Australia. Dwarf slender tree, masses of deep crimson flowers in large clusters. Should be planted more than it is. Rare. Strong plants.....\$.75
74. **Eucalyptus grossa**
Western Australia. Golden yellow flowers, thick foliage, dark glossy green. New. Strong plants.....\$1.25
- 75.***Eucalyptus macrocarpa**
Western Australia. A shrub and not a tree, never attains a height of more than about fifteen feet. Very handsome glaucous foliage similar to the young foliage on the common Blue Gum which it always retains. In the axils of the leaves are individual deep rose pink flowers with beautiful golden anthers, flowers sometimes measure four inches across. Very beautiful and rare. New introduction. 1 gallon cans\$5.00
76. **Eucalyptus miniata**
Western Australia. Small tree, beautiful vermilion colored flowers. New. Strong plants\$1.25
77. **Eucalyptus oldfieldii**
Western Australia. Splendid bushy tree, handsome golden flowers. New. Strong plants\$1.50
78. **Eucalyptus pyreiformis**
Western Australia. Small slender growing tree, drooping clusters of very large crimson flowers with golden anthers, flowers measure from two and one-half to three and one-half inches across. Quite spectacular in bloom. New introduction. Strong plants\$1.25
79. **Eucalyptus Steedmanii**
Western Australia. Small weeping tree, beautiful golden yellow flowers. Very rare. New introduction. Strong plants\$1.50
80. **Eucalyptus Stricklandii**
Western Australia. Small tree, rather spreading habit, deep golden flowers. New introduction. Strong plants.....\$1.25
- 81.***Eucalyptus torquata**
Western Australia. Small slender growing tree, small leaves, reddish trunk and branches, large clusters of beautifully shaped vermilion buds and deep rose colored flowers. Very pretty. New introduction. Strong plants.....\$1.25
- The Eucalypti listed above are all from Western Australia and quite distinct from the ordinary forms of Eucalypti. They are all small trees with large brilliant flowers and possess a great deal of merit and are particularly well adapted to small gardens, some of them have been discovered only in the last few years.*
- 82.***Eugenia Smithii (Lilli-pilli tree)**
Australia. A very symmetrical growing tree, pretty bronze colored foliage, covered in winter with large drooping clusters of lavender colored berries. In our opinion the most desirable and handsome of all Eugénias. A very beautiful thing for table decoration. Scarce. Strong plants.....\$2.00
- 83.***Eupatorium ianthinum**
Mexico. Small bushy evergreen shrub, handsome dark purplish tomentose foliage, large heads of violet colored flowers. Does better with half shade. Strong plants.....\$.50
- 84.***Euphorbia fulgens (Syn. Euphorbia jacquinaeflora)**
Mexico. Slender twiggy Euphorbia, can be grown either as a bush or trained against the wall, masses of scarlet and orange flowers along the branches. A very beautiful and choice thing. Strong plants.....\$.50

85. **Euryops species**
 South Africa. Evergreen shrub, trunk and limbs covered with whitish pubescence, bright yellow flowers somewhat similar to the Sun Flower, about three inches across, constant bloomer and showy. Admirable cut flower. New introduction. 1 gallon cans.....\$1.50
86. **Ferdinandia eminens (Daisy tree)**
 Brazil. Tall spreading evergreen tree with large handsome tomentose leaves. In spring and early summer enormous clusters of daisy like flowers, white rays with yellow center, very fragrant. This is an unusually beautiful and scarce tree and should be freely planted on private grounds. 1 gallon cans\$3.50
87. **Fuchsia cordifolia**
 Mexico. Makes a fine large shapely bush, light green foliage, flowers almost continuously. The flowers are single, long scarlet tubes with green on the edge of the petals. Strong plants\$.50
88. **Fuchsia corymbiflora**
 Peru. Large handsome tomentose dark green leaves, drooping sprays on long pendent stalks of vivid red flowers with long tubes. A very beautiful and aristocratic Fuchsia. Strong plants\$.50
89. **Fuchsia corymbiflora alba**
 Peru. Similar to the preceding with the exception that the tube is white and the corolla red. Strong plants.....\$.50
90. **Fuchsia gracilis variety compacta**
 South America. This is one of the most satisfactory and beautiful Fuchsias we have grown, makes a dense compact mass to a height of eight to ten feet, will stand well in full sun, branches are a mass of vivid purple and red flowers. One of the most floriferous shrubs we have in our garden and in our opinion one of the best all around Fuchsias. This particular type is very uncommon. Strong plants\$.50
91. **Fuchsia lycioides**
 South America. Fine strong growing Fuchsia, small handsome dark green foliage, arching branches covered with clusters of small deep crimson flowers. Does very well in full sun. Strong plants\$.50
92. **Fuchsia reflexa**
 Mexico. Somewhat similar to Fuchsia thymifolia, with the exception that it is not as erect a grower, flowers instead of being deep red are scarlet. Strong plants.....\$1.00
93. **Fuchsia serratifolia**
 Peru. Not as strong growing as Fuchsia lycioides but perhaps the most beautiful flower of all. Long blush carmine tubes, orange pink corolla with green sepals. A very striking and rare Fuchsia. Strong plants.....\$1.50
94. **Fuchsia splendens**
 Mexico. Handsome dark green tomentose foliage, makes a large bush, drooping flowers of vivid scarlet and green making a striking color combination. It is a fine winter bloomer. A fine thing either grown as a bush or in a hanging basket. Strong plants\$1.00
95. **Fuchsia thymifolia**
 Mexico. Makes a good sized shrub, minute foliage, masses of very small crimson single flowers. Strong plants....\$.50
96. **Fuchsia triphylla**
 West Indies. Beautiful vivid dark green, sometimes purplish foliage, drooping clusters of long tubular vermilion flowers. Strong grower and continuous bloomer. No more beautiful Fuchsia grown than this. Strong plants.....\$.50

- Several hybrids of *Fuchsia tryphylla*, together with a large range of hybrid *Fuchsias* of various kinds and colors. Strong plants\$.50
- 97.***Gardenia thunbergia**
 South Africa. Evergreen shrub, compact grower, handsome dark green cut foliage, large single white fragrant flowers, makes a large bush. Very distinctive and beautiful, quite unlike the ordinary types. Uncommon. Strong plants \$1.00
- 98.***Goodia lotifolia**
 Australia. Rather slender growing shrub belonging to the Pea family, racemes of yellow pea like flowers. Very pretty, new introduction. 4 inch pots.....\$.75
99. **Gossypium sturtii (Desert Rose)**
 West Australia. Medium sized shrub belonging to the Hibiscus family. Masses of single flowers about three inches across, lavender in color with dark center. Very showy and unusual. New introduction. 1 gallon cans.....\$1.50
100. **Grevillea obtusifolia**
 Australia. Evergreen trailing shrub, admirable for a ground covering, neat dark green foliage, red flowers very similar to *Grevillea thelemanniana*. Good thing for banks and rockeries. New introduction. 1 gallon cans.....\$1.50
101. **Grevillea paniculata**
 Australia. Evergreen shrub with very spreading habit, sending up tall slender branches from the center, in early spring a sheet of white. Pretty and desirable. New introduction. Very fragrant. 1 gallon cans\$1.50
102. **Grevillea rosmarinaefolia**
 Australia. Bushy compact growing *Grevillea*, deep green foliage covered when in bloom with racemes of pink and white flowers, very pretty and desirable evergreen shrub. New introduction and rare. 1 gallon cans.....\$1.50
- 103.***Grevillea sulphurea**
 Australia. Medium sized evergreen shrub, pretty foliage, racemes of sulphur yellow flowers. New introduction and rare. 1 gallon cans.....\$1.50
- 104.***Grevillea Wilsonii**
 Australia. Medium sized evergreen shrub, foliage quite prickly, terminal racemes of deep vivid crimson flowers. One of the handsomest of them all. New introduction and very rare\$3.00
- 105.***Grewia caffra**
 South Africa. Evergreen shrub, pretty star shaped purplish blooms with yellow centers. Very good garden shrub. Strong plants\$.75
106. **Greyia Sutherlandii**
 South Africa. Belongs to the Saxifrage family, an evergreen shrub with vivid green leaves somewhat like those of a lime tree. In winter and early spring has long spikes of scarlet flowers with long vivid protruding stamens. Extremely showy and attractive. 1 gallon cans.....\$1.50
- 107.***Haemalanthus populifolius**
 Makes a good sized evergreen tree, large dark green leaves shaped like those of a Poplar, many of which turn rich glowing red, flowers in greenish white tassels, the beauty of the tree being in the color of the foliage. 1 gallon cans.\$1.50
108. **Hamelia patens**
 Florida and Cuba. Strong growing evergreen shrub, bronze

red foliage, panicles of small tubular orange scarlet flowers on the new growth in summer and autumn. Quite a handsome shrub for a hot situation. Rare.....\$.75

109. **Helianthemum formosum**

Spain and Portugal. Of the Sun Rose family, making a small bush in height to about two feet and about three feet through. Small silvery gray foliage, yellow flowers purple at the base about two inches across. Very pretty shrub. Likes full sun. 1 gallon cans.....\$.75

110. **Helianthemum ocymoides**

Spain and Portugal. Somewhat similar to the preceding with the exception that it grows taller, branches are twiggy, abundant cymes of yellow flowers with a dark eye about an inch and a half across. Very pretty and free flowering, being in bloom nearly all the time. Full sun. 1 gallon cans\$.75

Helianthemum species and hybrids in various colors \$.25

111.***Heterocentron alba**

Mexico. Can be grown either as a shrub or herbaceous plant, four angled branches, terminal panicles of pure white flowers. Either sun or half shade. 1 gallon cans\$.75

112. **Heterocentron rosea**

Mexico. Similar to the preceding with the exception that the flowers are deep rosy pink. This is a very beautiful plant and rare. 1 gallon cans.....\$2.50

113. **Hibiscus arnottianus**

Mountain ranges of the Hawaiian group. Tall growing Hibiscus, eventually making a large tree, leaves with red veins, covered in summer and autumn with quantities of pure white flowers with red column. This has the unusual feature in Hibiscus of being extremely fragrant. One of the hardiest of the family and very beautiful. Scarce. 1 gallon cans\$2.00

114. **Hibiscus arnottianus variety**

Similar to the preceding with the exception that the plant has a bushier habit and does not grow so tall, the flowers are a little larger and equally fragrant. 1 gallon cans \$2.00

115. **Hibiscus chrysantha**

South Africa. Low growing shrub, bright green foliage, deep yellow flowers with purple eye. Very pretty.....\$.75

116. **Hibiscus diversifolius**

Australia. Shrubby trailing species making large masses, large yellow flowers with dark center, finely cut foliage, very free bloomer. Naturalizes itself well. New introduction. 4 inch pots\$.50

117. **Hibiscus heterophyllus**

Australia. Tall growing shrub, handsome dark green foliage, very large white flowers with pink tinge, deep maroon center, splendid shrub. This is not new but quite uncommon\$.50

118.***Hibiscus huegellii**

Australia. Tall strong growing shrub, handsome cut foliage, large campanulate shaped blue flowers. Very unusual and distinct species. New.....\$.50

119. **Hibiscus pedunculatus**

South Africa. Medium sized shrub, small dark green foliage, small rosy pink flowers on long drooping stems. Rare. New introduction\$.50

120. *Hibiscus rosa sinensis*
One of our specialties. We have the largest collection in the state, the best types from Hawaii and elsewhere in large range of colors and sizes. From.....\$.75 to \$5.00
121. *Holmskioldtia sanguinea*
India. Can be grown either as a shrub or a climber. Racemes of glowing brick red bracts, one of the most beautiful and showy shrubs introduced in recent years. This plant in full bloom is an ornament to any garden, prefers a warm sunny situation with plenty of water, under this kind of treatment it is almost a perpetual bloomer. New introduction. 1 gallon cans.....\$1.50
- 122.**Hymenosporum flavum*
Australia. Makes a tall slender shapely evergreen tree covered in spring and early summer with masses of tubular yellow fragrant flowers. This tree in bloom is a very beautiful sight. When the flowers fall the ground underneath them is literally a carpet of yellow. Does very well in California. Not a new introduction, but far too seldom seen. 1 gallon cans.....\$.75
123. *Inga pulcherrima*
Mexico. Belonging to the Leguminous family, very feathery pinnate foliage, makes eventually a large spreading shrub, in spring and early summer a sheet of vivid scarlet fluffy heads of flowers shaped like a pom-pom. An unusually beautiful and aristocratic shrub. Rare \$.50 to \$5.00
124. *Iochroma coccinea*
South America. Strong growing evergreen shrub, large dark green leaves, drooping clusters of light scarlet tubular flowers. Very showy plant, the best of this family.\$.50
- 125.**Lasiandra rosea*
Tropical America. Often called *Pleroma rosea*. Similar to the purple *Pleroma* with the exception that the foliage is much lighter in color and the flowers, instead of being purple, are rosy pink and quite large. Very rare. New introduction\$1.00 up
126. *Lavandula stoechas*
Spain. A very strong growing and unusual Lavender with large spikes of purple flowers. A striking and unusual shrub in full bloom. 1 gallon cans.....\$.50
- 127.**Leptospermum scoparium grandiflora*
variety *roseum*
Australia and New Zealand. Large growing evergreen shrub, graceful arching branches, masses of large rosy pink single flowers considerably larger than the flowers of other *Leptospermums*. Scarce. 4 inch pots.....\$1.00
- 128.**Leucophyllum texanum*
Texas and Mexico. Evergreen shrub growing to a height of about seven feet, pretty small silvery gray foliage, trumpet shaped lavender colored flowers in summer. Likes a fairly dry sunny situation. Very beautiful and scarce shrub. A particularly good thing for a desert garden, stands quite low temperature. 1 gallon cans.....\$.75
129. *Leucadendron argenteum*
Table Mountain, South Africa. The famous "Silver Tree" from the Cape of Good Hope. Glossy silvery leaves, the young foliage being particularly beautiful, yellow flower spikes shaped like a pipe cone. Must have a well drained situation. There is no more beautiful tree grown than this. This tree only grows in its natural state on Table Mountain and the neighboring slope of Lion Head, Cape Town. Strong plants\$1.50

- 130.***Libonia floribunda**
Brazil. Dwarf evergreen shrub, small neat foliage covered in winter with masses of tubular yellow and scarlet flowers. Very pretty and free blooming, a splendid winter bloomer. Not new but not used nearly as much as it should be. Strong plants\$.50
- 131.***Lopezia species (Butterfly flower)**
Mexico. Slender twiggy shrubby plant growing to about five feet in height, good thing for the base of a wall, masses of small red flowers. Very pretty and attractive, much stronger grower than the commtn type.....\$.50
132. **Luculia gratissima**
China. A strong growing evergreen shrub, handsome foliage, the young growth tinged red, very large terminal corymbs of salver shaped flowers which are light rosy pink and delightfully fragrant, sometimes twenty to forty flowers in a cluster. Very good winter bloomer, one of the choicest shrubs and very uncommon, prefers half shade.\$5.00 up
- 133.***Mackaya bella (Syn. Asystasia bella)**
South Africa. Strong growing evergreen shrub, large racemes of trumpet shaped beautifully veined lavender flowers. Very choice shrub, likes some shade. 1 gallon cans\$1.00
- 134.***Mahernia verticillata**
South Africa. Low growing trailing evergreen shrub. When in bloom is literally smothered with small bell-shaped clear yellow flowers, delightfully fragrant. Very beautiful for ground covering or rockery. Strong plants.\$.50
135. **Malvastrum capensis**
South Africa. Evergreen shrub, small malva shaped foliage, masses of deep rose pink flowers about the size of a quarter, constant and profuse bloomer. Not new but possessing a great deal of merit. Strong plants.....\$.25
136. **Metrosideros robusta**
New Zealand. Tall growing spreading tree, handsome grayish evergreen foliage covered in summer time with large clusters of deep crimson or scarlet flowers. Does particularly well near the sea coast, in fact, will stand the full force of the sea winds and the ocean spray, will stand a good deal of cold. Should be much more extensively planted than it is. Strong plants.....\$.50
- 137.***Mitraria coccinea**
Chile. Dwarf growing evergreen shrub to about three feet, small shining foliage, large individual somewhat helmet shaped bright scarlet flowers, likes partial shade. Very scarce and beautiful plant. New introduction. 4 inch pots\$1.50
138. **Murraya exotica**
Australia. Belonging to the orange family, very compact growing evergreen shrub, making a beautiful shapely bush, small dark green compound foliage, pure white flowers resembling small orange blossoms in clusters, very fragrant. 4 inch pots.....\$.75
139. **Ochna multiflora**
South Africa. Medium sized evergreen shrub, new foliage a beautiful bronzy color, when in bloom masses of deep yellow flowers resembling those of a Hypericum, succeeded by the seed vessels which have vivid red capsules with black seeds. This is a very beautiful thing either in flower or fruit. Either sun or shade. New introduction. 4 inch pots.....\$.75

140. **Oxylobium lanceolatum**
Australia. Medium sized evergreen shrub belonging to the pea family, rather light green foliage, spikes of deep yellow pea shaped flowers, seems to like a good deal of water. New introduction. 4 inch pots.....\$.75
141. **Ozothamnus rosmarinifolius**
(Syn. **Helichrysum rosmarinifolius**)
Australia. Medium sized evergreen shrub, foliage resembling Rosemary, clusters of pure white flowers somewhat resembling our native Buckwheat. Very attractive choice shrub. New introduction. 4 inch pots.....\$.50
- 142.***Pelargonium coccineum**
South Africa species. Very dark green leaves, spikes of small vivid scarlet flowers in good sized clusters, makes large spreading clumps. A very choice and beautiful plant for a garden. Rare.....\$.50
- 143.***Pelargonium crispum**
South Africa. Small neat compact bush, small dark green very fragrant foliage, heads of single purple flowers. Sun or half shade\$.25
144. **Pelargonium echinatum**
South Africa. The parent of most of our white show Pelargoniums. Semi-tuberous root, stems somewhat thorny, masses of white flowers like a geranium in good sized heads changing to pink. Makes a bush about one foot high and two feet across. Likes full sun and will stand any amount of neglect and drought. Rare.....\$.50
145. **Pelargonium zonale**
South Africa. The original wild scarlet geranium. Offered because it is the parent of most of our scarlet geraniums. Single scarlet flowers. Strong plants.....\$.25
- 146.***Pentas carnea**
South Africa. Small shrub, clusters of single pink flowers very similar to the Bouvardia. Very pretty and choice shrub, susceptible to frost.....\$.75
- 147.***Pentstemon antirrhinoides**
California. Our native shrubby Pentstemon, covered in spring and summer with yellow flowers covering the whole bush. A very fine thing for a sunny situation in the garden. Stands drought well. Strong plants.....\$.50
148. **Pereskia bleo**
Tropical America. Belonging to the Cactus family, can be grown either as a climber or a bush. Very handsome lustrous green foliage, large clusters of single deep rose colored flowers. In our opinion the finest of all the Pereskias. Strong plants\$1.00
149. **Phygelius capensis**
South Africa. Not new but has sufficient merit to be used oftener than it is. Can be grown either as a shrub, climber or treated as a herbaceous plant, long spikes of tubular brick red flowers with a yellow throat. Will stand in a very dry hot situation. Quite a showy thing in full bloom. 1 gallon cans\$.50
150. **Pleroma splendens variety grandiflora**
(Syn. **Lasiandra splendens**)
Brazil. Evergreen shrub, very handsome foliage, pubescent leaves reddish violet to purple tinge, clusters of large salver shaped flowers of very deep royal purple color. There is no more striking or aristocratic shrub than this one when it is in bloom. An improvement on the old type. New introduction\$.75

151. *Podalyria calyptrata* (Large pink Keurtje)
 South Africa. Very beautiful evergreen shrub, neat silvery foliage, good sized clusters of rosy pink large pea shaped fragrant flowers very much resembling the common sweet pea. A beautiful thing for cut flowers and lasts well in water. Named after Podalyrius, a physician who accompanied the Greek army to the Siege of Troy. New introduction. 4 inch pots.....\$1.00
- 152.**Polygala apopetala*
 Lower California. Tall, rather slender growing evergreen shrub, dark green foliage, covered in spring and summer with spikes of purple pea shaped flowers. Very showy and profuse bloomer.....\$.50
- 153.**Polygala virgata*
 South Africa. Smaler growing than the preceding, habit somewhat ike a Broom, the pea shaped fowers are a deep rosy pink or purple. Uncommon.....\$.75
- 154.**Prostanthera nivea* (Mint Bush)
 West Austraiia. Evergreen shrub with neat, small green foliage, covered in spring and early summer along the new growth with very beautiful small white somewhat trumpet shaped flowers. Lasts well in water. New introduction\$.75
155. *Psoralea pinnata*
 South Africa. Tall, strong growing evergreen shrub, foliage very similar to a Pine tree, spikes of deep blue and white flowers, quite attractive and uncommon.....\$.50
156. *Psoralea aphylla*
 South Africa. Much slenderer than the preceding, habit and growth similar to our Brooms or Genistas, racemes of blue and white pea shaped flowers. New introduction.\$.50
157. *Regelia pileata*
 Australia. Strong growing evergreen shrub with dense dark green foliage resembling a Melaleuca, to which it is closely allied, an abundance of purple Bottle Brush shaped blooms. New introduction. 1 gallon cans.....\$1.00
158. *Rhodorhiza Florida* (Syn. *Convolvulus Florida*)
 Canary Islands. Rather slender shrub growing eventually to about ten feet in height, willowy, slender branches covered during almost the entire year with masses of small, pure white, single flowers of the regular *Convolvulus* shape. Very pretty and attractive shrub, does equally well in sun or shade. An unusually good garden shrub and very uncommon. 1 gallon cans.....\$1.50
- 159.**Rondeletia amoena*
 South America. Good sized shrub, very handsome foliage, large nicles of pink flowers with yellow throat. Unusually beautiful shrub of aristocratic appearance. Scarce.\$1.00
160. *Rondeletia cordata*
 South America. Very similar to the preceding with the exception that the leaves are smoother and the flowers are rather more pronounced pink. A splendid shapely shrub particularly beautiful and uncommon.....\$1.00
- 161.**Rondeletia speciosa*
 South America. Much dwarfer than the preceding, with a brilliant orange and scarlet bloom.....\$1.50
- 162.**Salvia arborea*
 Mexico. The largest growing of the family, makes a large,

hard wooded shrub to about eight feet in height, racemes of scarlet flowers, very attractive. Rare.....\$.75

163. **Senecio species**
Arizona. Makes a good sized shrub, very quick growing, splendid winter bloomer when it is a sheet of yellow bloom in large terminal panicles. A very fine thing, new. 1 gallon cans\$.50
164. **Solanum lanceolatum**
Tropical America. Dark green tomentose foliage, panicles of dark purple flowers with yellow eye. Very profuse and constant bloomer, quite a good shrub. Uncommon. 1 gallon cans\$.50
- 165.***Sophora Davidii**
China. Deciduous shrub, small pinnate foliage, a sheet of blue pea shaped flowers in early spring. Should be much more planted than it is. Very beautiful when in full bloom. Uncommon\$.50
- 166.***Sophora secundiflora**
Texas and Mexico. Evergreen shrub, large panicles of very deep blue pea shaped flowers very similar to Wistaria. Very striking thing when in bloom. 1 gallon cans\$.75
167. **Strophanthus speciosus**
South Africa. Good sized evergreen shrub, very dark green foliage, good sized heads of very curious flowers in terminal cymes, reddish color without, cream color within, lobes producing filiform tails about one inch long. Very uncommon. 1 gallon cans.....\$1.00
168. **Styrax Californica (Snowdrop bush)**
California. Deciduous shrub growing in a very limited area in California, leaves bright green, slightly pubescent, drooping flowers in terminal clusters, pure white with yellow stamens. Very uncommon and pretty shrub. 1 gallon cans\$1.25
169. **Tecoma garrocha**
Argentina. Deciduous shrub with yellow and scarlet trumpet shaped flowers in slender terminal racemes, a very pretty and striking shrub in full bloom. Should be planted more than it is. 1 gallon cans.....\$.75
- 170.***Thevetia nerifolia**
Mexico. Evergreen shrub, pretty shining foliage, the flowers instead of being yellow as in the common species are deep orange color. Uncommon. Strong plants.....\$.50
- 171.***Thryallis Braziliensis**
Brazil. Evergreen shrub, large panicles of very beautiful yellow flowers tinted red in late summer and autumn, makes a very pretty hedge. A beautiful and aristocratic flowering shrub. Rare. 4 inch pots.....\$1.50
172. **Tithonia arborea (Tree Sun Flower)**
Mexico. A gigantic grower, sending up a mass of flower stalks twelve feet high, clusters of enormous deep golden yellow composite flowers resembling sun flowers at the end of each branch. Is the better for being cut down to the ground every winter when it is through blooming. A very striking and handsome plant, invariably attracts attention. Uncommon. 1 gallon cans.....\$.50
173. **Tricuspidaria dependens**
(Syn. **Crinodendron dependens**)
Chile. Evergreen tree very much resembling our Oaks in foliage, covered in summer with white, drooping, bell-

shaped flowers. Would make a very handsome street tree as it has a compact, shapely habit of growth. Uncommon.
 1 gallon cans.....\$1.00

174. *Turraea obtusifolia*
 South Africa. Medium sized evergreen shrub, free bloomer, attractive white star shaped flowers very similar to the white Jasmine. Stands clipping very well, makes an excellent hedge. A fine shrub. Not common. 1 gallon cans\$1.00

175. *Vitex negundo*
 China. Deciduous shrub growing to a good size, handsome foliage, grayish underneath, large spikes of blue flowers, very striking and showy plant when in full bloom, has a symmetrical and handsome habit, worth a place in any garden. Quite uncommon.....\$.50

176.**Westringia rosmarinifolia*
 Australia. Evergreen, medium sized shrub, olive green foliage similar to the Rosemary, branches and under side of leaves silvery white, clusters of white flowers. Uncommon. 1 gallon cans\$.75

CLIMBING AND TWINING PLANTS

177.**Antigonon leptopus*
 Mexico. Deciduous climbing vine, will eventually cover a large area, blooms in summer and autumn, racemes of deep rose colored flowers of a papery texture. An unusually beautiful thing in a sunny situation either on a roof or fence or climbing up a tree where it is a sheet of pink. Strong plants\$.50

178.**Bauhinia galpinii*
 South Africa. Can be grown either as a climber or a shrub. Orange nasturtium colored flowers. Very beautiful and rare and quite spectacular when in full bloom.\$3.00

179.**Bauhinia racemosa*
 China. A very strong growing evergreen climber, beautiful foliage, young growth reddish, large panicles of white flowers with red stamens, very fragrant. One of the most beautiful introductions of recent years. Our plant on the roof of a large lath house when in bloom is a sight worth seeing. Quite new and very scarce.....\$3.00

180.**Beaumontia grandiflora*
 Nepal, India. A very strong growing climber, glossy, dark green, handsome foliage, clusters of large, trumpet shaped, pure white flowers, very fragrant. Does well in California in any situation not subject to hard frosts. No more beautiful climbing shrub. In bloom with us eight months out of the twelve.....\$3.00

181. *Bougainvillea lateritia*
 South Africa. Brick red, probably the strongest and largest grower of all Bougainvilleas. Free bloomer, very beautiful and spectacular on the side or roof of a building. 1 gallon cans\$2.50

182.**Bougainvillea praetorii*
 Something entirely new in Bougainvilleas, bronzy yellow bracts of a very unusual and striking color. Quite distinct and new. Small plants\$5.00

183. *Bougainvillea rosea*
 New hybrid from Australit. Enormous trusses of deep, rosy pink bracts. Cannot be surpassed when it is in full

bloom, a very fine introduction. Considered by many people to be the finest of all Bougainvilleas. 1 gallon cans\$2.00

184.***Bougainvillea Thomasii**

New hybrid from Australia. Red bracts rather deeper in color than Bougainvillea lateritia, very pretty. New introduction. 1 gallon cans.....\$1.50

185. **Clematis Montana**

China. Strong growing vine covered in winter and early spring with masses of large, pure white, starry flowers. Strong plants\$.50

186.***Clematis Montana rubens**

China. Similar to the preceding with the exception that the flowers are deep rose color. Very beautiful climbing vine. This Clematis and the one preceding it are very fine when rambling through trees, they send out very long trails of bloom, presenting a beautiful spectacle. 4 inch pots\$.75

187. **Clianthus puniceus**

New Zealand. Scandent or climbing shrub belonging to the Pea family, handsome, bright green pinnate foliage, racemes of drooping, bright scarlet flowers shaped like a parrot's bill. Very beautiful and showy plant and uncommon. 1 gallon cans\$.75

188.***Cryptostegia Madagascariensis**

Madagascar. A climbing or twining shrub with good sized, pink, trumpet shaped flowers. Likes full sun. Scarce. 4 inch pots\$1.00

189.***Distictis cinerea**

South America. Strong growing evergreen climber belonging to the Bignonia family and in our opinion one of the finest of all the Bignoniaceous group. Blooms eight months of the year, large clusters of trumpet shaped flowers, purple when they first open, shading to lavender, handsome foliage, very free flowering and delightfully fragrant. No one who has esteem for climbing plants should be without this. 1 gallon cans.....\$1.50 to \$4.00

190. **Fuchsia coccinea**

Mexico. A strong growing, rampant Fuchsia with climbing habit, a mass of large drooping scarlet single flowers.

191. **Hibbertia volubilis**

Australia. Evergreen climbing or twining shrub, dark glossy green foliage, large pure yellow flowers of good substance about two and one-half inches across. Likes full sun, can also be used to cover banks and will always attract attention. Rare and beautiful thing. New introduction. 1 gallon cans\$3.50

192. **Jacquemontia Californica**

Lower California and Mexico. Twining shrub, small, grayish green foliage, covered in summer with a mass of sky blue convolvulus flowers about the size of a quarter, likes full sun. A rare and beautiful climbing plant.\$.75 up

193. **Jasminum stephanense**

A new hybrid originating in France. Strong growers, light pink flowers in good sized clusters, fragrant. New introduction. 1 gallon cans\$.50

194.***Lathyrus splendens**

California. A very beautiful climbing perennial Pea. Flowers vary in shade from red to deep crimson, will cover

considerable space and is an extremely fine thing when covered with its large flower spikes. Is impatient of too much water, likes full sun. Strong plants.....\$.50

195. *Lonicera hildebrandii* (Giant Honeysuckle)

Burma. The largest growing of this family, covering a large area. Fine, lustrous, evergreen foliage, racemes of very large flowers opening yellow, fading out to white, very fragrant. We have measured individual flowers on our plants five inches long. A very beautiful thing as a cut flower. Uncommon. 4 inch pots.....\$1.00

196. *Oxera pulchella*

New Caledonia. Dark green, handsome evergreen foliage, large clusters of pure white, waxy, tubular flowers in drooping panicles. This is an unusually choice and beautiful climber, does particularly well either in sun or shade and should be far more extensively planted than it is. Very rare. 1 gallon cans.....\$2.50

197.Passiflora princeps* (Passion Flower)**

South America. In our opinion the gem of all the family, leathery foliage, very infrequently attacked by insects. Long racemes of vivid scarlet flowers on long wiry stems. Very beautiful, should be planted over a pergola so that the long flower clusters hang down through the roof. Uncommon. Strong plants\$.75

198. *Pentstemon cordifolius*

California. Shrubby climbing Pentstemon, often covering a considerable area, the ends of the young branches bearing large clusters of red blooms. Very pretty and attractive shrub in the garden, does particularly well rambling in bushes and trees. Strong plants.....\$.50

199.Polygonum baldschuanicum* (Climbing Knot-weed)**

Bokhara. A very strong rampant growing climber covered when it is in bloom in the summer with long trailing racemes of white flowers with a blush tinge. A beautiful thing for cut flower work. Perfectly hardy in any situation, will stand a great deal of cold. Strong plants ..\$. 50

200.Rosa gigantea***

Western China. A tremendous grower, will cover a large space in a short time. In spring a mass of large creamy yellow single flowers in good sized sprays. No more fragrant rose in existence, scents the whole area for a considerable distance around. A very beautiful sight when it is in full bloom. Rare. Strong plants.....\$1.50 up

201. *Solandra cleggii*

South America. Very strong, rampant grower covering a large area, although it can be grown either as a bush or a standard. Large shining foliage, flowers open almost white with very heavily shaded dark interior, flowers afterward turn deep yellow. New. 1 gallon cans.....\$2.00

202. *Solandra guttata*

Copa de Oro. The old "Cup of Gold," similar to the preceding, the flowers are a little larger and are not so heavily marked on the inside, large, shining foliage. Strong plants\$.75

203. *Solandra longiflora*

Mexico. Much slenderer growth than the two preceding, leaves much smaller, flowers are creamy white with frilled edges. A very pretty climbing plant and uncommon. 1 gallon cans\$1.50

204.Solanum guyanum***

South America. Evergreen climbing plant attaining a con-

siderable size, panicles of deep lavender colored flowers with yellow centers, an unusual color in Solanums, can be trained as a shrub. Very uncommon. 4 inch pots.....\$1.00

- 205.***Stephanotis floribunda**
 Madagascar. Twining or climbing evergreen vine, very handsome, dark green leaves, clusters of pure white, fragrant flowers. Does well in a protected place, prefers half shade. Extensively grown in greenhouses in Europe and the East. Strong plants\$1.00
206. **Stigmaphyllon ciliatum**
 South America. Climbing vine, slender growth, very pretty foliage, sprays of bright yellow flowers of large size, very much resembling the Orchid oncidium. A very beautiful and choice thing and should be planted far more frequently than it is. Uncommon. 1 gallon cans.....\$1.50
207. **Tecoma Australis, variety rosea**
 Australia. A very strong growing evergreen vine, handsome green pinnate foliage similar to the common Tecoma Australis, with the exception that the flowers instead of being white or cream color are rosy pink in large drooping racemes. 1 gallon cans\$1.00
208. **Thunbergia Gibsonii**
 South Africa. Twining vine, very tomentose foliage, large deep orange trumpet shaped flowers, very freely produced. Showy and beautiful\$.50
209. **Trachelospermum divaricatum (Syn. Rhyncospermum divaricatum) (Star Jasmine)**
 East Asia and Malay. Handsome glossy dark green foliage, panicles of flowers of deep yellow color, very fragrant. Resembles the well known Trachelospermum jasminoides with the exception that the flowers instead of being white are yellow. New and rare. 4 inch pots \$2.00

HERBACEOUS AND TUBEROUS OR BULBOUS ROOTED PLANTS

210. **Aristea capitata**
 South Africa. Iridaceous plant, handsome sword-like evergreen foliage to about three or four feet tall, spikes of deep blue flowers. Very showy, rare. Strong plants.....\$.75
211. **Aristea ecklonis**
 South Africa. Much dwarfer than the preceding, masses of beautiful blue flowers during the summer. Strong plants\$.50
212. **Aristea species**
 South Africa. Similar to the preceding, somewhat dwarfer, flowers rather lighter shade. Strong plants.....\$.50
213. **Dierama pulcherrima (Syn. Sparaxis pulcherrima)**
 South Africa. Evergreen bulbous plant making large masses of long sword like leaves to about three feet, drooping pink bell shaped flowers hanging by a thin thread to long wire stems from three and one-half to six feet tall. No more beautiful bulbous plant in existence. The sight of a group of these flowers swaying in the breeze is very charming. Strong plants.....\$.50
214. **Dierama pendula**
 Rosy pink hybrid, new introduction. Strong plants.....\$.50
215. **Dierama purpurea**
 Purple hybrid, new introduction. Strong plants.....\$.50

216. *Dimorphotheca cuneata*
South Africa. Shrubby plant, large flowers like a Daisy, white petals with yellow centers. A very beautiful thing, fine for picking. Rare, new introduction. Strong plants\$1.00
217. *Epidendrum O'Brienii*
Guatemala. Ground orchid, large heads of cinnabar red flowers on very long stems, does particularly well against a south wall and will literally flower every day in the year. There is no more beautiful or free flowering plant of its kind than this and it should be far more planted than it is. It is perfectly happy in any location free from killing frosts\$1.00 to \$5.00
218. *Epidendrum radicans*
Guatemala. Similar to the preceding with the exception that the flowers are orange scarlet and the plant is not so strong a grower\$2.00
219. *Erodium corsicum*
Corsica. A low growing compact herbaceous plant, rose pink flowers like a single Geranium. A very pretty thing for rockeries or dwarf borders. 4 inch pots.....\$.50
220. *Erythrina herbacea*
Texas and Mexico. A herbaceous coral plant dying down to the ground every winter, makes eventually large clumps, spikes of bright scarlet bloom. Very uncommon. Strong plants\$.50
221. *Gazania coccinea*
South Africa. New introduction with a wonderful range in colors in orange, yellow, red and bronze shades, much longer stems than the old type. Strong plants.....\$.75
222. *Hibiscus manihot*
China. Can be grown either as a shrub or as a herbaceous plant. Very large primrose yellow flowers with maroon center. Beautiful and showy Hibiscus. Strong plants \$.50
223. *Linum flavum*
South Europe. Herbaceous, will eventually make a good sized spreading mass about six inches high, very pretty and free blooming, sheet of yellow flowers. Full sun. Strong plants\$.50
224. *Malvastrum species*
Mexico. Gray foliage, grows to about five feet tall, masses of salmon pink flowers with yellow stamens. Very pretty herbaceous plant, good for cut flowers. Splendid thing for naturalizing in waste places.....\$.25
225. *Moraea bicolor*
South Africa. Same habit as the ordinary *Moraea* with the exception that the flowers are cream yellow with dark centers. Free blooming and very attractive. Strong plants\$.75
- 226.**Moraea Robinsonii*
Lord Howe's Island. Tall, handsome sword shaped leaves with long spikes of pure white flowers beautifully marked red and yellow near the base. Very rare. Considered to be the handsomest of all the *Moraeas*.....\$25.00
- 227.**Pasithea coerulea*
Chile. Bulbous plant brought out by one of Clarence Elliott's Expedition into Chile. Clusters of deep blue flowers on stems about two feet tall. Very rare and beautiful.\$.50

228. Reinwardtia tetragyna

India. Low growing, shrubby plant with very beautiful clear yellow tubular shaped blooms, much lighter in color than Reinwardtia trigynum which it resembles in many particulars. Very scarce. 1 gallon cans.....\$1.00

229.*Ruellia macrantha

Brazil. Can be grown either as a shrub or herbaceous perennial. Spikes of deep pink almost purplish trumpet shaped flowers in good sized panicles at the end of the young growth. The plant grows to about six feet in height. Uncommon. Strong plants\$.50

230.*Salvia involucrata

Mexico. Better grown as a herbaceous plant. Large heads of deep rosy pink flowers, one of the handsomest of the whole family and very seldom seen. Does better with half shade. Strong plants\$.75

231.*Schizocentron roseum (Syn. Heeria rosea)

Mexico. Plant belonging to the Melastoma family, making a dense mat on the ground. Very small bright green foliage, covered in summer with masses of single rosy purple flowers, a very beautiful and striking plant, a fine thing for rock work or banks. Very rare. Strong plants....\$2.50
